

Finding Patterns and Predicting England's Traffic

Rich Wareham¹, Nick Kingsbury¹, University of Cambridge

Q: Can we predict "usual" traffic flow across England?

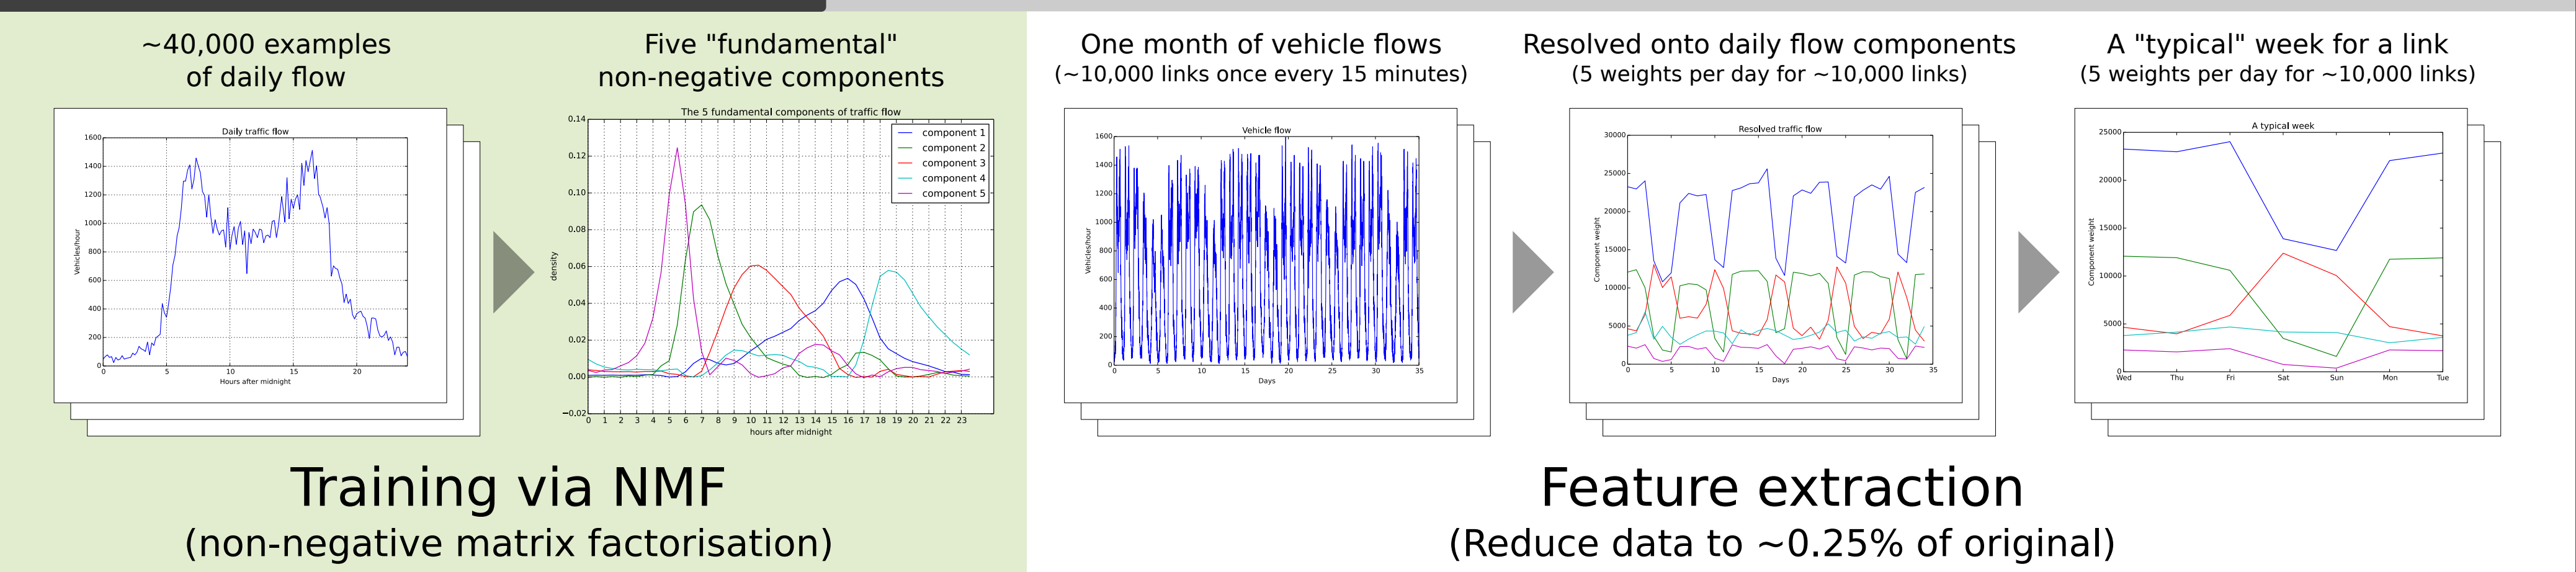

DATA PIPELINE

Where we get our real-time data from and what we do with it.

ANALYSIS

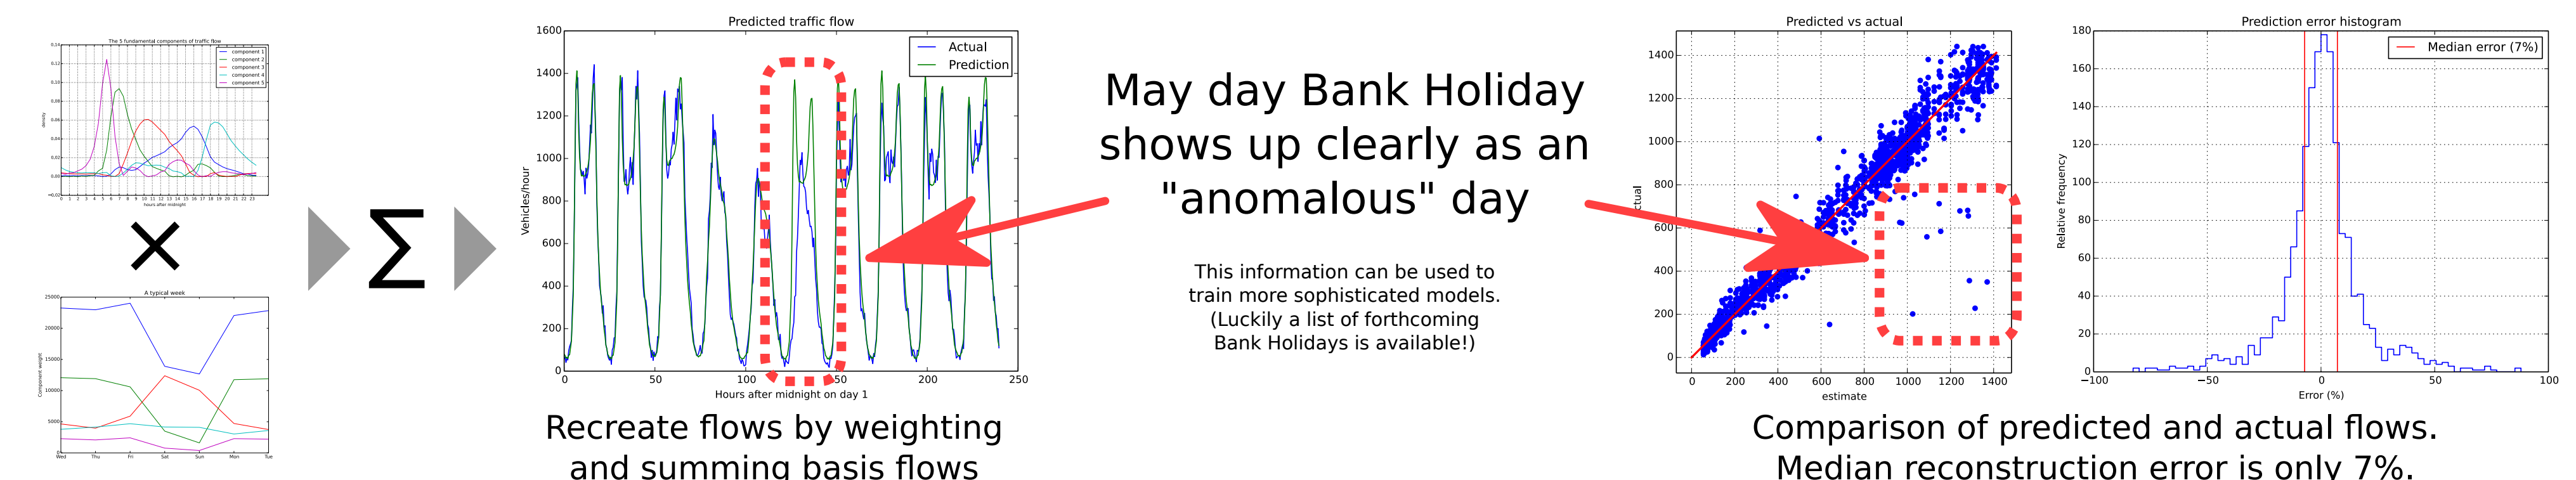

Also known as: "drinking from the fire hose".

PREDICTION

An example using a single representative link.

What happens if we predict a given link's flow using it's typical behaviour over a week as a guide?

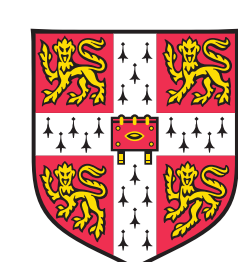

A: Yes, with around 7% error.
